Bagus Wijanarko

Life Long Learner | Geo Data Engineering & Remote Sensing |
Sustainability/Traceability Enthusiast
Jakarta Metropolitan Area

Summary

I'm a Geodetic Engineering Graduate with interest in Geospatial
Data Science, Remote Sensing and Applied GIS/Photogrammetry,
currently learning R Language and Data Engineering to improve my
role as Quality Assurance Specialist

Experience

APRIL

LiDAR Quality Assurance Specialist
June 2024 - Present (2 years 1 month)
Pangkalan Kerinci

- Create Quality Assurance framework for LiDAR data operational inventory
- Ensure LiDAR QA pipeline working properly starting from post-acquisition to pre-production process
- Develop more advanced & agile automation for LiDAR QA flow process to increase operational productivity
- Develop more accurate & precise QA parameters/threshold to ensure the operational data quality
- Maintain geospatial databases of all QA process to keep the data traceability always tracked
- Monitor, report and verify any quality issue of LiDAR data with field operational team, production team and other PICs
- Conduct workshop and hands on training for the new recruits in LiDAR operational team

PT SMART Tbk

1 year 10 months
Conservation Area MRV Officer
May 2023 - May 2024 (1 year 1 month)
Jakarta, Indonesia

Assigned under Nature Protection & Enhancement Sub-Division, Conservation
Area MRV Department for:

- Delineating supply base boundaries from 3rd party suppliers for deforestation alert analysis
- Investigating raised deforestation/peat development alert cases from buyers/customers and verify it from 3rd party suppliers
- Proactively engage with suppliers and buyers about the confirmed active deforestation/peat development cases to discuss it with the GAR team and other relevant stakeholders
- Assisting in spatial data creation/mining to be provided for upcoming/ongoing projects related to European Union Deforestation Regulation (EUDR)

Traceability and Verification Officer

August 2022 - April 2023 (9 months)

Jakarta

Assigned under Traceable and Transparent Production Department, Sustainability and Strategic Project Division for:

- Conducting spatial verification of traceability declaration from 3rd party suppliers
- Delineating supply base map from traceability declaration into geodatabase
- Completing the missing coordinate/address information in traceability declaration using public domain data
- Maintaining geodatabase completeness of attribute information related to supply base

Esri Indonesia

Professional Fellowship Mentoring Participant

February 2023 - April 2023 (3 months)

I was selected as one of few participants who are allowed to develop our learning projects in 2 months mentoring session, named "Palm Oil Trace in the Atmosphere of Sumatra and Borneo". This project aim to introduce and give early insights to the viewers about the supply chain process of palm oil industry related to the accumulation of Green House Gas (GHG) in the atmosphere measured by satellite sensor. It was a great opportunity to boost my skills for my career, especially implementing ArcGIS products in Geostatistics and Data Analytics for sustainable palm oil industry.

Avirtech

Data Processor

December 2021 - July 2022 (8 months)

Jakarta, Indonesia

Staff in the mapping project management team, tasked to assist the completion of every projects given by company clients, especially in

processing measured field data in the form of RGB or multispectral orthophoto, with addition of GPS data for various purposes such as tree counting, estate mapping, terrain mapping and also geometric displacement quality control. I also had done some automation processes for sugarcane weed detection and yellow palm detection using Principal Component Analysis (PCA) combined with Python script (ArcPy)

Indonesian National Institute of Aeronautics and Space (LAPAN) Research Intern

January 2020 - January 2020 (1 month)

Jakarta Timur, Jakarta Raya, Indonesia

Internship as research student (PKL) at Remote Sensing Application Center of LAPAN for research of "Land Cover Change Analysis at Rote Island using Object based classification with Landsat and PlanetScope imagery". Results: identification of land drought in the period 1999 – 2009 (bare ground increased by 21%) and the expansion of agricultural areas in the period 2009 – 2019 (vegetation increased by 10%) using eCognition and ArcGIS within 20 working days.

Departement of Geodetic Engineering UGM

Junior Project Assistant

March 2019 - May 2019 (3 months)

Working on designing canal blockage in three separated locations of peatland (lahan gambut) using LiDAR elevation and intensity data as well calculating the Normalized Burn Ratio (NBR) using Sentinel-2 data for Peat Restoration Agency (BRG). Results: The estimated amount of peat depth measurement data is 25% of the total size data, which is statistically effective enough to represent the existing depth using the Ordinary Least Squares (OLS) method using ArcGIS and Global Mapper.

Kantor Jasa Surveyor Kadaster Berlisensi (KJSKB) Rizarda dan rekan

Data Processor Assistant for PTSL Jakarta Selatan 2018

August 2018 - August 2018 (1 month)

Jakarta Selatan, Jakarta Raya, Indonesia

Internship as data processor for assisting land parcell mapping at government project of Pendaftaran Tanah Sistematis Lengkap (PTSL) Jakarta Selatan under Licensed Cadastral Surveyor Agency Rizarda and Co. Result: layouting 31 survey drawings from 2 kelurahan (Bukit Duri and Manggarai Selatan) using AutoCAD Map 3D in 20 working days.

Education

Universitas Gadjah Mada (UGM)

Bachelor's degree, Geodetic Engineering · (July 2016 - June 2021)

SMA Negeri 91 Jakarta

Science major · (2012 - 2015)
